John McMahon  
Deputy Director for Control Intelligence  
CIA  
Washington, D.C. 20505

Dear Mr. McMahon:

In the December issue of Science 85, you will find several articles devoted to a topic dear to your heart: increasing the chances for peace in our nuclear age.

I have enclosed a complimentary copy in the hope that you will find our articles provocative and useful, if not entirely consonant with your personal views.

Also, I sincerely hope you will be able to take a few minutes to drop me a line expressing your reactions, be they positive or critical, to our articles. On the one hand, such a letter will help justify the extra time and money spent producing this package of articles; on the other hand, we would like to continue the dialogue with our readers on this topic and need to know how experts like you and your associates view our first efforts. Did they, in short, add something to this vital national debate?

Hoping to hear from you.

Sincerely,

Ellis Rubinstein  
Managing Editor

Enclosure

P.S. If you could use additional copies of this issue, just drop me a note.

*In the event that my name rings a bell with you, I was Managing Editor of Spectrum until recently and ran the Round-table on technology transfer you attended a couple of years ago.*
